Database design

restaurant_dishes links dishes and restaurants (many-to-many)

Foodies · Web Programming 1 · Julien Matar, Peter Nehmeh, Freddy Rayess · same tables as db/schema.sql

PK primary key
FK foreign key
UQ unique
1 N one to many
UQ* unique together
one review per user and restaurant

column
added in stage 3: the details for first-timers (diet, allergens, ingredients, photo)

Deleting a user, restaurant or dish also deletes its reviews, favorites and menu lines. A chat log keeps its question (user_id and matched_dish_id become empty).
